PROFESSIONAL SUMMARY

Motivated Software Developer skilled in Python Full Stack Development, with hands-on experience building web applications, REST APIs, and database-driven systems using Python, Django, React.js, and MySQL. Completed an intensive full-stack training program and delivered multiple production-style projects covering authentication, payments, and real-time communication. Strong foundation in software development best practices, eager to contribute as a Software Developer / Backend Developer / Full Stack Developer.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), SQL

Frontend: React.js, HTML5, CSS3, Bootstrap

Backend: Django, Django REST Framework, REST APIs, JWT Authentication

Database: MySQL, Database Design, Query Optimization

Tools: Git, GitHub, VS Code, Redis

Concepts: Full Stack Development, WebSockets, MQTT, Software Development Best Practices

PRACTICAL TRAINING EXPERIENCE

Python Full-Stack Development Training Program

Aug 2025 – Mar 2026

Pumo Technovation

- Completed 3–4 hands-on, project-based modules covering Python, Django, React.js, HTML, CSS, JavaScript, and MySQL over an 8-month training program.
- Built and tested REST APIs with Django REST Framework, connecting frontend components with backend services across 3–4 modules.
- Implemented CRUD operations, user authentication, and relational database management spanning 3–4 hands-on builds.
- Practiced version control and structured Git and GitHub workflows across 3–4 project repositories, following industry best practices.
- Applied full-stack development concepts to 3–4 real-world applications, strengthening readiness for professional developer roles.

PROJECTS

BusBook — Full-Stack Bus Booking Platform

Django REST Framework, React.js, MySQL, JWT Authentication, Razorpay

- Engineered a full-stack bus booking platform managing 100+ routes, 6,500+ trips, and 250,000+ seat records.
- Designed secure JWT-based authentication and integrated Razorpay payment gateway for end-to-end booking, payment, and cancellation workflows.
- Built and optimized REST APIs with Django REST Framework, reducing query load and improving response performance.
- Created an admin dashboard for real-time booking management, revenue tracking, and coupon administration.

Smart Home Automation System

Django, React.js, MQTT, WebSockets, Redis, MySQL, APScheduler

- Developed a full-stack IoT application enabling real-time device control and monitoring via WebSockets (Django Channels) and MQTT.
- Implemented secure authentication, role-based access control, and CRUD operations for device and room management.
- Automated scheduled device actions using APScheduler, improving reliability and reducing manual intervention.
- Designed a MySQL database with activity logging and integrated Redis for real-time, low-latency communication.

EDUCATION

Bachelor of Computer Applications (BCA)

2022 – 2025

J.J. College of Arts and Science, Pudukkottai | CGPA: 7.15

CERTIFICATIONS

- Technology Job Simulation — Deloitte (Forage), 2025
- Software Development Job Simulation — Datacom (Forage), 2025
